ABOUT ME

Backend Developer with 3 years of experience in building, maintaining, and optimizing scalable applications. Proficient in Java, Spring Boot, .NET, and RESTful web services, with a strong understanding of software development best practices. Skilled at analyzing and resolving production issues, providing support to critical systems, and ensuring reliable performance under pressure.

EDUCATION

Bachelor of Business Informatics, University of Costa Rica

2017 - 2022

SKILLS

Technical: .NET (ASP.NET MVC, Entity Framework), Java, Spring Boot, Vue.js, MySQL, SQL Server, GitHub, Scrum, Kanban, Cursor (AI development environment using Claude 4, Gemini, GPT-4o)

Languages: Spanish (Native), English (Intermediate)

EXPERIENCE

Backend Developer, NearLinx

Jan 2025 – Present

Designed and implemented backend features using Java Spring Boot and SQL, resolving bugs and writing unit/integration tests to ensure code quality. Refactored stored procedures and optimized database queries to improve performance. Led database cleanup and normalization initiatives, applying SQL best practices and consistent conventions. Utilized Cursor with various AI models to support development and migration tasks.

Technologies: Java Spring Boot, SQL Server, JUnit, Git, Postman, Azure DevOps, Cursor (AI development environment using Claude 4, Gemini, GPT-4o).

Support Software Developer, NearLinx

Nov 2023 – Dec 2024

Diagnosed and resolved production issues, including application bugs and data errors. Fixed data inconsistencies, generated missing records, and handled issue escalations. Delivered bulk data operations using SQL scripts and batch processes. Automated recurring billing and provisioning tasks with Python and SQL, and contributed to performance investigations.

Technologies: Java Spring Boot, SQL Server, Python, Azure DevOps..

Software Developer, NearLinx

Dec 2022 – Nov 2023

Managed user support requests, ensuring SLA compliance. Collaborated directly with clients to analyze problems and deliver appropriate solutions. Developed a web application using a low-code platform, enhancing its capabilities through custom JavaScript and SQL scripts.

Technologies: Low-code platform, Microsoft SQL Server, GitLab, JavaScript.

Full Stack Developer, NearLinx

Jul 2022 – Dec 2022

Built RESTful APIs with ASP.NET and developed responsive front-end interfaces using Vue.js. Managed database access via Entity Framework and LINQ. Implemented unit/integration tests with NUnit, Moq, and Jest; conducted E2E testing with Cypress. Configured CI/CD pipelines with GitHub Actions for automated Azure deployments.

Technologies: ASP.NET, Vue.js, SQL Server, Entity Framework, LINQ, JWT, NUnit, Moq, Jest, Cypress, Visual Studio, GitHub, GitHub Actions.
